

Your final final project is going to be turnaround time. You are now el/la maestro/a and the rest of the class and me are the alumnos. What you will do is plan and teach a lesson on something that we have NOT learned in any year of Spanish. What should you choose? This is up to you. It must be something interesting but keep it simple (15-20 words or 5 minutes of lecture). You will be working with a partner to teach a lesson between 15-20 minutes long. You will have two (maybe three) days to plan it out, get the materials ready, copy the materials, and practice what you are going to teach. See me if you have any pronunciation concerns as well.

Order of instruction:

1. Introduce material (vocab list, matching, flashcards etc.)
2. Show overhead practicing material (make on my computer)
3. Have one partner activity practicing the material (could be the A/B slips or something else)
4. A short game practicing material
5. A short homework assignment (15-20 questions)

That's it! Wow, this is going to be fun! You must be present when your group teaches. Keep it simple. At least you do not have to do your own homework. ☺
